

Abstract

The present invention relates to new 4-hydroxy-2H-thieno[2,3-e]-1,2-thiazine-3-  
5 carboxamide-1,1-dioxides of general formula

wherein X, is fluorine, chlorine, bromide or CF<sub>3</sub>, R<sup>1</sup> is hydrogen or C<sub>1</sub>-C<sub>2</sub> and R<sup>2</sup> is  
10 C<sub>1</sub>-C<sub>2</sub>, which compounds have, inter alia, anti-inflammatory activity.
